TULPAR

**MODULAR
DESIGN FOR FUTURE
OPERATIONAL
NEEDS**

TULPAR is an armored tracked vehicle with a modular structure that allows for different missions. It can range from 28,000 to 45,000 kg. Its modular hull and subsystem structure provide a clear operational advantage. This vehicle is available in various configurations: light tank, personnel carrier, reconnaissance, command and control, air defense, and ambulance. This multi-purpose platform offers high firepower, superior survivability, and a modular structure. Its modular infrastructure provides immense flexibility in broader volume and mission configurations.
