

AMPHIBIOUS
ARMORED TRACKED VEHICLE

TULPAR-S

Otokar

TULPAR-S

The TULPAR-S amphibious tracked vehicle offers flexibility of use thanks to its innovative modular design. It is highly effective in missions such as high-intensity conflicts, peacekeeping, and disaster relief, and can be adapted to different needs.

TULPAR-S is designed as an amphibious light tracked vehicle offering a common platform for mission specific variants such as:

- Infantry Fighting Vehicle
- Armored Personnel Carrier
- Armored Weapon Carrier
- Maintenance and Recovery Vehicle
- Command and Control
- Ambulance
- Reconnaissance Vehicle
